More information about Erasmus

The Erasmus Program, now called Erasmus+, is a European Union initiative promoting education, training, youth engagement, and sport. It provides opportunities for students, teachers, and trainees to study, work, or train abroad. The program aims to foster international collaboration, improve language skills, and enhance intercultural understanding. Erasmus+ also offers youth exchanges, volunteering, and internships to develop personal and professional skills. It supports individuals with fewer opportunities, ensuring inclusivity and accessibility. Participants receive financial aid covering travel, living expenses, and additional needs, such as for those with disabilities. The program promotes institutional partnerships and encourages innovation in education and training. It operates both in EU countries and partner nations worldwide, broadening its impact. Erasmus+ is celebrated as one of the EU's most successful initiatives, helping millions grow academically, socially, and professionally.
